

ELECTRIC SPRAY PUMP

Fly Faster. Cover More Acreage. More Reliably.

Kawak Aviation's variable-speed, brushless electric spray pump, the KFlow 200 is engineered to deliver precision flow control, unmatched reliability, and industry-leading performance for agricultural aircraft.

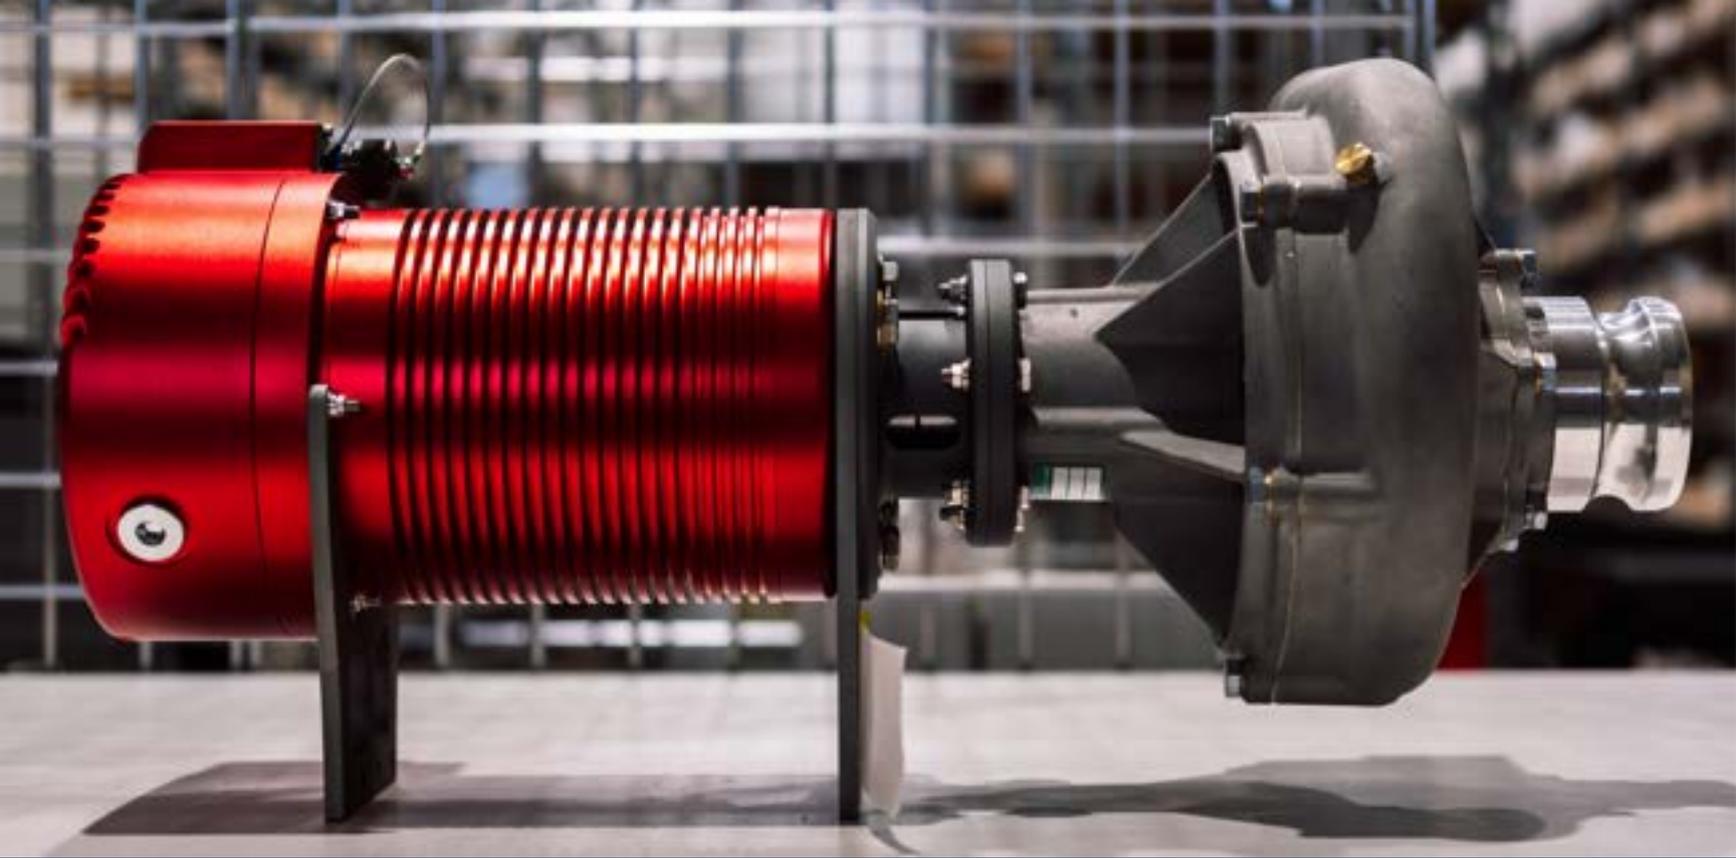

Built from over a decade of field experience and 30,000+ reliable operational hours, the KFlow 200 sets a new standard for efficient aerial applications, so operators can spray more acres in less time, with confidence in every drop.

- Proven Reliability
- Precision-Engineered
- Kawak 28VDC Brushless Motor
- Smart Control Options
- Simple & Efficient Design
- Weight of pump/assembly 42 lbs (17 kg)

Works with the
AirVision Flow
Controller from
Tabula

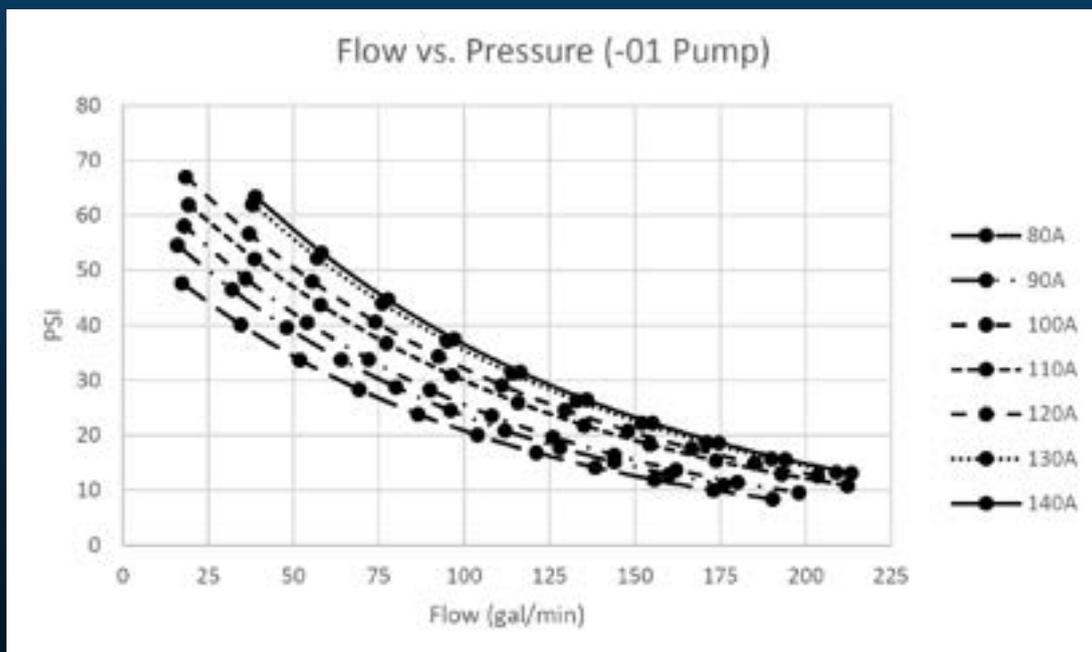

Results that show

The new KFlow 200 variable speed high output spray pump is a game-changer in aerial crop spraying. Its advanced features and efficient design make it the perfect solution for operators looking to boost their productivity.

*Kawak high flow electric pump test results utilizing optimally sized 2 1/2" inlet hose and 2" outlet hose.
