

# JUST PLAIN WORKS

Suppress fires faster with  
multiple drop capability

Simplify transport with a  
collapsible, compact design

Access more water sources with  
Powerfill systems

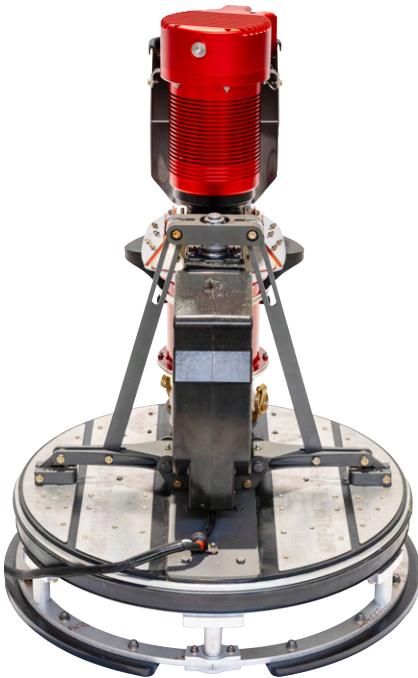

Keep flying with no maintenance,  
zero adjustment

# SIMPLY BETTER

- **Simple by design.** The Cascade Firefighting Bucket's simple, purpose-built valve delivers reliable, adjustment-free performance with fewer failure points, ensuring consistent drops when the fire line demands it most.
- **Drop exactly when you need to.** Kawak's electric linear valve gives fast, reliable actuation so you get repeatable drops every time.
- **Fill quickly from shallow sources.** High-flow AC or DC Powerfill options deliver enormous GPM even in as little as 16" of water, fewer refills, more drops.
- **Faster dip cycles.** Free-motion valve opening lets the bucket sink and refill quickly for rapid turnarounds between drops.
- **Consistent, powerful coverage.** Design and valve system produce dense, repeatable drop patterns that improve suppression effectiveness.

## Cascade Bucket Valve

Improved storage and handling with collapsible top frame.

MADE IN THE  
U.S.A.
